WRITING

Read the extract below. It is part of a newspaper article on the loss of national and cultural identity, in which readers were asked to send in their opinions. You decide to write a letter responding to the points raised and expressing your own views.

Write your answer in 120 - 150 words in an appropriate style.

Do not write any postal address.

We are losing our national and cultural identity. Because recent advances in technology and the easy availability and speed of air travel, different countries are communicating more often and are therefore becoming more and more alike. The same shopping malls and fast food outlets can be found almost everywhere. So can the same types of office blocks, motorways, TV programmes and even lifestyles. How can we maintain the traditions that make each nation unique?

In my opinion, the loss of national and cultural identity is a process that was determined by the very foundations of the existing society. Therefore, we, as a part of the nation, should not be anxious about this tendency, because without it the world would have been less convenient.

To exemplify my statement, conceive of the fashion industry. In case that all nations have its own clothes identity, companies producing cheap and convenient garment wouldn't ~~have~~ appeared at the market. Such corporations can only make standardized clothes.

To sum up, I can not say that the disappearance of cultural diversity is a positive consequence of the technological progress, however it is hard to deny that new technologies bring what makes our life easier and better.
