WRITING

Read the extract below. It is part of a newspaper article on the loss of national and cultural identity, in which readers were asked to send in their opinions. You decide to write a letter responding to the points raised and expressing your own views.

Write your answer in 120 - 150 words in an appropriate style.

Do not write any postal address.

We are losing our national and cultural identity. Because recent advances in technology and the easy availability and speed of air travel, different countries are communicating more often and are therefore becoming more and more alike. The same shopping malls and fast food outlets can be found almost everywhere. So can the same types of office blocks, motorways, TV programmes and even lifestyles. How can we maintain the traditions that make each nation unique?

Hello, I am Sergey and I am from Volgodonsk. In my opinion, globalization has nothing in common with culture. I live in Russia and our culture is highly valued there. There are a lot of songs, book and traditions that keep our culture and prevent us from losing it. As for shops, I don't think that they make people buy same things, moreover, they let people choose whatever they want and express their individuality. You also mentioned that communication with people from different countries makes us lose our national and cultural identity but I don't agree with you. I think it helps us to share our culture with other people and make foreigners more informed about our country. In conclusion, I would like to say that we are not losing our national and cultural identity because of globalization.
